

FABI'S TUBE BUDDY

FABIAN HIEBER

NOW UNDERSTAND YOUTUBE VIDEOS

Tired of not understanding a video you watch on YouTube?

Your Options:

- Watch the video again
- Use the comment section to get dumb answers
- Ask someone smarter to explain it

Or:

Ask anything about the video Fabi's Tube Buddy

HOW IS THIS EVEN POSSIBLE?

Large Language Model (LLM):

ChatOpenAI model (gpt-3.5-turbo)

Embeddings:

OpenAIEmbeddings

Vector Store:

FAISS

Transcript Processing:

YouTubeTranscriptApi

Chains:

- ConversationalRetrievalChain

Used for user conversation with the bot

- RetrievalQA

Used for generating initial example questions

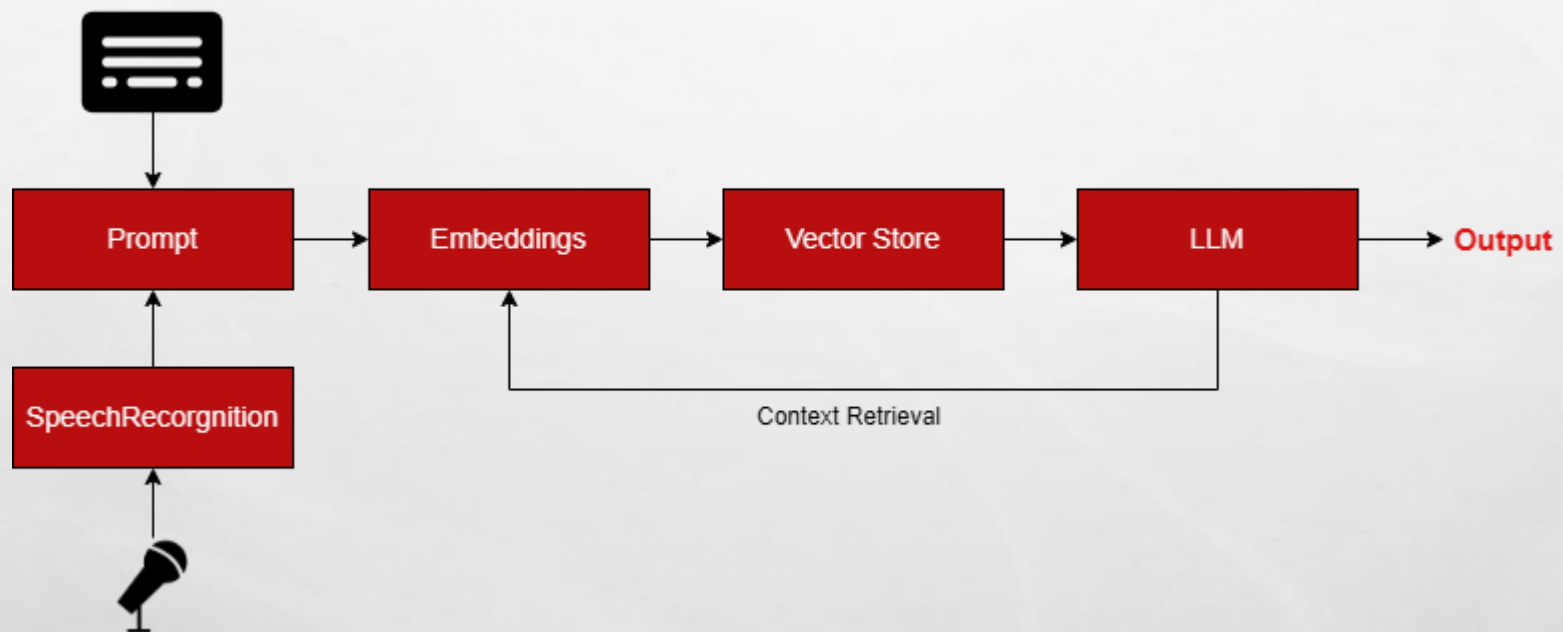

Speech to Text:

Google Cloud Speech API

Deployment:

Flask Website

DATAFLOW

DATASET

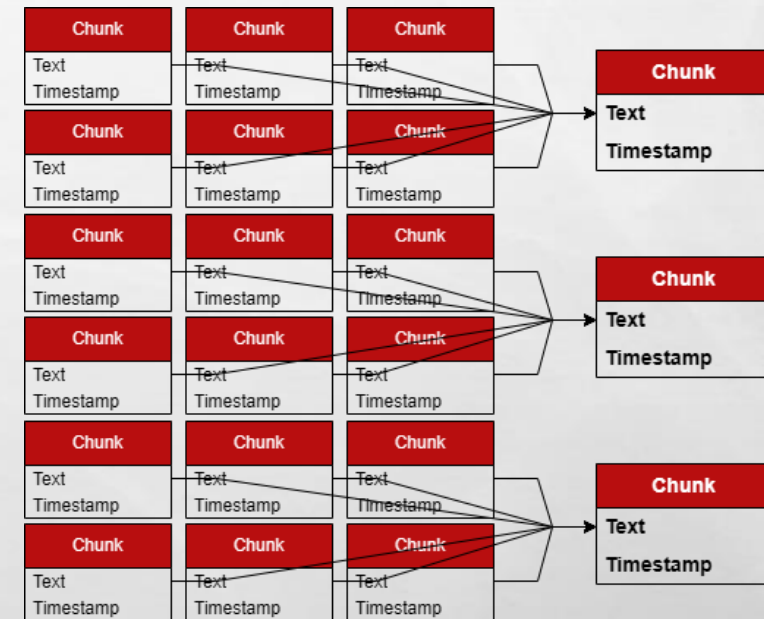

Your provided Video

YouTubeTranscriptApi:

- Transcription comes in little chunks with timestamps
- Combined in larger chunks with maximum of 1000 characters
- Preserved the start time of the chunk for metadata
- Texts cleaned

FAISS:

- OpenAIEmbeddings with texts and metadata

Q&A AGENT

LLM:

GPT-3.5-turbo

- Temperature 0.2

Memory:

ConversationBufferWindowMemory

- Save 3 messages

Chain:

ConversationalRetrievalChain

- LangSmith Callback

Vector Store:

FAISS

- Metadata: Timestamps
- Search Type: Similarity
- Documents: 4

Prompt:

- Persona of AI assistant and chatter
- Video name mentioned
- Attention drawn to Conversation
- Fallback response
- Question

EVALUATION

LangSmith:

Compared gpt-4o-mini and gpt-3.5-turbo

P50 Latency: 0.55s

P99 Latency: 2.98s

QAEvalChain:

Compared human answer to AI generated

Added false positive

8 / 8 correct ✓

Giskard:

- Performance ✓
- Robustness 2 X
- Calibration ✓
- Data Leakage ✓
- Stochasticity ✓
- Injection attacks ✓
- Hallucination & misinformation ✓
- Harmful content generation ✓
- Stereotypes ✓
- Information disclosure 1 X
- Output formatting ✓

DEPLOYMENT

Flask:

- Deployed on Heroku
- Push to deploy

Endpoints:

- Process video
- Process voice
- Questions

ChainManager:

Persists trained chains during runtime in memory

- Id
- Title
- QA_chain
- Example_chain
- Examples

DEMO

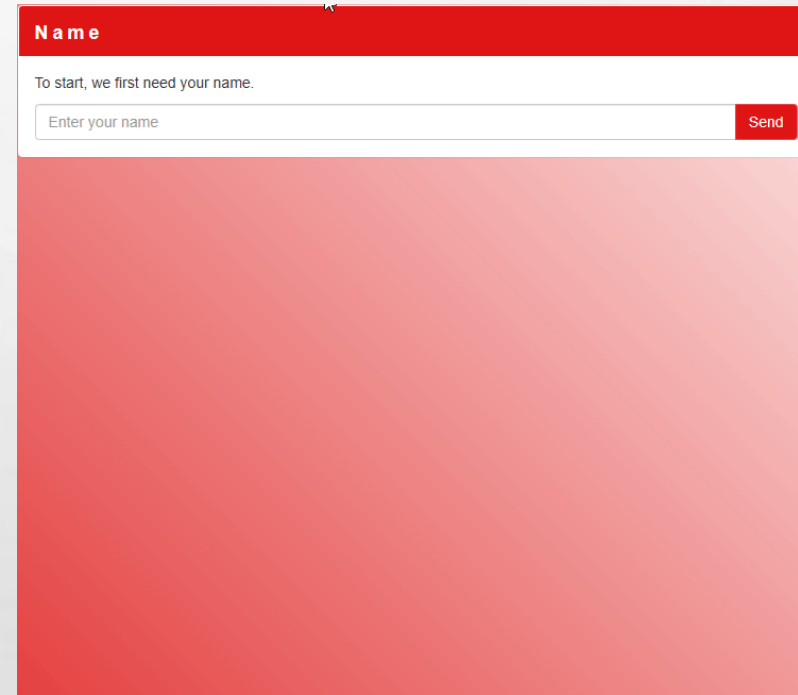

Deployment:
Flask Server on Heroku

What you'll find?

- World fastest Chatbot
- Video Viewer
- Example questions

The screenshot shows a web interface with a red header bar containing the text "Name". Below the header, there is a white box with the text "To start, we first need your name." and a text input field with the placeholder "Enter your name". To the right of the input field is a red button with the text "Send". The background of the page is a solid light red color.
